

Michael Roddy

Meroddy05@gmail.com | (402) 680-5820 | Omaha, NE | michael-rodny.com

SKILLS

Languages

Python, Java, C, JavaScript

Frameworks & Libraries

React (Vite), Django / DRF, Keras / TensorFlow

Tools & Platforms

Git, Azure DevOps (CI/CD, YAML), SQL/SQLite, Agile/Scrum

EDUCATION

University of Nebraska at Omaha

Expected May 2027

B.S. in Computer Science (concentration: Software Engineering)

B.S. in Artificial Intelligence

Omaha, NE

GPA: 3.98

Metropolitan Community College – Associate of Arts

May 2023

Omaha, NE

PROJECTS

Personal Portfolio Website — *React (Vite), JavaScript, CSS*

- Built a componentized portfolio with JSON-driven content, interactive project cards/modals, and resume download to streamline recruiter review
- Implemented a secure contact flow via formsubmit.co, enabling direct inbound recruiter contact

Stock Price Prediction Tool — *Python, Keras/TensorFlow*

- Built a stacked-LSTM recurrent neural network (2 layers, 100 units each) to forecast equity closing prices from historical data, including iterative 7-day forecasting
- Engineered and normalized 60-day feature sequences (moving averages, returns) with scikit-learn; trained with early stopping to reduce overfitting

Peer-to-Peer Service Marketplace — *React (Vite), Django REST Framework, Python — team project*

- Collaborated on a full-stack marketplace enabling users to list, book, pay for, and review local gig services
- Built modular REST API apps (bookings, messaging, payments, reviews) consumed by a React frontend; prepared nginx deployment config

Budget Tracker — *Django, Python*

- Built a personal finance app modeling recurring/one-time income and expenses with form-driven CRUD views and SQLite persistence
- Prepared production deployment artifacts (Gunicorn + systemd, nginx templates) for a deploy-ready pipeline

EXPERIENCE

Systems Test Engineer Intern — WoodmenLife

June 2026 – August 2026

- Automated regression and API testing for a .NET phone directory application using ParaSoft SOAtest, with automated results reporting to Azure DevOps Test Plans
- Built a scalable automated test suite (Azure DevOps YAML pipelines) that runs on a schedule and grows with the application without breaking existing tests
- Validated endpoint calls, data validation, and search/filtering functionality; identified and resolved bugs while participating in Agile ceremonies (standups, sprint planning, retrospectives)

Job Shadow — Infinity Precision Ag

- Shadowed integration of software platforms with drone technology, gaining exposure to sensor data collection and its impact on agricultural drone performance

Dietary Aide — Brookestone Village

June 2021 – Current

- Served meals to 35+ residents in accordance with dietary procedures and food safety regulations
- Monitored and documented resident consumption/behavior changes to support safe, individualized diets

EAGLE SCOUT

Eagle Scout through Troop 282. Planned, organized, and instructed the creation of park benches for all visitors of the Town and Country Humane Society.

August 2021
