Omaha, NE

SKILLS

- Manipulating Data Structures
- Work with Git
- Adaptable
- C Programming
- Java Programming
- Python Programming
- Web Development
- Time Management
- Problem Solving

EDUCATION

University of Nebraska at Omaha –

B.S. in Computer Science (concentration: Software Engineering)

B.S. in Artificial Intelligence

Omaha, NE

Expected in May 2027

GPA: 3.97

Metropolitan Community College –

Associate of Arts

Omaha, NE

May 2023

Projects

Ordering Application – Software Engineering Course

- Application that allows the user to order from a menu of food. Created it using Java, utilizing hierarchy between classes that share similar characteristics. Resulted in a great grasp of how Java applications can minimize code repetition by sharing methods through class hierarchy.

Data Storing – Data Structures Course

- Application that stores data sets using different data structures. It helps to illustrate the differences of a variety of data structures: their strengths and weaknesses. Data structures used: Lists, Trees, Stacks, Heaps, and Queues.

Experience

Job Shadow Infinity Precision Ag

- Working with Andrew Keikemeier from Infinity Precision Ag and assisting in integrating software platforms with drone technologies. Gaining exposure to applications of computer science in agriculture. Learning about data collection of sensor inputs and how new software solutions impact drone performance and precision.

WORK EXPERIENCE

Brookestone Village – Dietary Aide

Omaha, NE

June 2021 – current

- Served each meal to 35+ residents in accordance with established schedules and dietary procedures.
- Followed all food safety regulations while preparing meals for the safety and wellbeing of the residents.
- Reported and documented resident changes in consumption or behaviors to maintain a safe diet for each resident.

Eagle Scout

Eagle Scout through Troop 282. Planned, organized, and instructed the creation of park benches for all visitors of the Town and Country Humane Society.

August 2021
